

MOTION 8

BRITISH MUSICIANS' UNION

HEALTH AND SAFETY

Motivation

Congress recalls the longstanding interest of member Unions in the health and safety of musicians. It notes that there have been a number of valuable initiatives at national level and recalls that two Conferences on the subject have been held under the aegis of FIM.

Motion

Congress now resolves to establish a long-term FIM programme covering the health and safety of professional musicians. The initial structure of the programme should draw upon the experience gained from the previously mentioned national and international activities and should take account of contractual, statutory and clinical aspects of the problem.
