

Public Service Broadcasting

- (2230) Congress wishes to express its continued support for public service broadcasting, affirmed at the previous Congress. We applaud the support of the European Commission and the inclusion in the Amsterdam Treaty of the notion that there should be a continuation of state broadcasting being supported through the taxation of license fee system and we call upon FIM to increase its activities in order to ensure that the ever increasing commercialization of TV and Radio does not further undermine the concept of high quality public service broadcasting designed to entertain, inform and educate.
